**Required feline vaccinations prior to boarding at Pee Wee and Pals Cattery  
(part of Sniffles and Friends Doggie Daycare and Pet Hotel):**

**Must be current on the following vaccinations:**

Every cat must have a current Rabies, Distemper combo, and Feline Leukemia Vaccine (or a Negative Feline Leukemia test within the last 30 days) prior to boarding.

We require all of our clients to bring a record of veterinary administered vaccinations for their cat, which is current within the past twelve months. Please bring your veterinarian's phone number with you for our files.

**Fleas:**

We take great care to ensure that our facility remains free of fleas. When we accept a cat for boarding, we assume it comes to us free of fleas or at least without a client's knowledge of their cat having them. If we find that a cat has fleas while in our care, we will treat them with an externally administered flea product, and this will be added to your boarding bill. If you have any concerns about fleas, we highly recommend that you treat them prior to boarding.

**Also . . .**

All cats over six months of age must be neutered or spayed.

We gladly accept cats three months of age and older.

Guests recently adopted from a cattery or shelter are welcome fourteen days after finding their new home, and have current veterinary approval.
